

HEMANT KUMAR JHA

Senior Software Engineer - Frontend | React.js | Next.js | TypeScript
Delhi, India | +91-8700858191 | hemantjhaa97@gmail.com | linkedin.com/in/hemant-jha-frontend-developer

Portfolio: hemant-jha-portfolio.vercel.app

PROFESSIONAL SUMMARY

Senior Software Engineer - Frontend with 6 years building production React.js and Next.js applications across automotive, healthcare, entertainment, and government platforms. Focused on Core Web Vitals optimization, WCAG 2.1 AA accessibility, and frontend security. Experienced mentoring engineers and establishing code quality standards.

CORE SKILLS

Frontend: React.js, Next.js (SSR/ISR), TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, Tailwind CSS, Material UI

State & Data: Redux Toolkit, TanStack Query, React Hooks, REST APIs, GraphQL

Performance: Core Web Vitals (LCP/INP/CLS), bundle optimization (Webpack, Vite), Lighthouse, Datadog RUM

Quality & Accessibility: Jest, React Testing Library, XSS/CSRF prevention, RBAC, JWT, WCAG 2.1 AA, ARIA, axe DevTools

Tooling & CI/CD: GitHub Actions, AWS (EC2, S3, CloudFront), Docker, Git, ESLint/Prettier/Husky, Figma

AI-Assisted Development: Cursor + Claude with MCP connectors for development acceleration, test scaffolding, accessibility audits, and PR review workflows; maintained 100% code review verification gate for production changes

WORK EXPERIENCE

Senior Software Engineer, Frontend | Appinventiv, Noida

Sep 2024 - Jul 2026

PROJECT: Sonny's Quivio - Automotive Dealer Platform

Tech: Next.js (SSR), React.js, TypeScript, Redux Toolkit, TanStack Query, Recharts, PWA/service workers, Webpack, Datadog RUM

- Architected config-driven, multi-tenant Next.js UI serving 10+ dealer partners across CRM, SAT, and white-label modules; built shared component library with 30+ reusable, documented components
- Optimized page performance through code-splitting, lazy loading, and asset optimization; measured improvements with Lighthouse and Datadog
- Developed SAT module as installable PWA with service workers, push notifications, and offline capability; integrated Recharts for real-time dealer analytics dashboard
- Established performance monitoring workflow with Datadog RUM; identified and debugged performance bottlenecks in production

PROJECT: Evaria - Healthcare & Wellness Platform

Tech: React.js, TypeScript, Material UI, SCSS, REST APIs, GraphQL, WebSockets, JWT, axe DevTools

- Built patient and admin portals with WCAG 2.1 AA compliance; implemented accessible form components, ARIA labels, and keyboard navigation throughout
- Designed and implemented JWT-based authentication with role-based access control (RBAC) for sensitive user workflows
- Integrated GraphQL subscriptions and WebSocket APIs for real-time data updates; managed connection lifecycle and error recovery
- Integrated Razorpay payment gateway; handled transaction state management and error cases

PROJECT: PVR INOX - Entertainment Booking & Payments

Tech: Next.js, React.js, TypeScript, Redux Toolkit, shadcn/ui, REST APIs, Jest, React Testing Library

- Developed multi-step booking and payment checkout flow for major cinema chain with form validation and draft persistence
- Wrote unit tests for booking and payment workflows; covered critical user paths to reduce regression risk
- Collaborated with QA and backend teams on API contracts, error handling, and edge case coverage

Senior Frontend Developer | UV Technologies, Noida

Nov 2022 - Aug 2024

- **Engineering Leadership:** Mentored 4 frontend engineers on React best practices, TypeScript patterns, and WCAG accessibility standards; established code review checklist adopted team-wide

- **Performance Debugging:** Analyzed real user monitoring (RUM) data from Datadog; profiled applications with Lighthouse; implemented targeted optimizations (code-splitting, lazy loading, image optimization)
- **Accessibility Implementation:** Built WCAG 2.1 AA-compliant React.js patient and admin platform; integrated axe DevTools into development workflow and trained team on accessibility patterns
- **API Integration:** Integrated REST, GraphQL, and WebSocket APIs for real-time features; designed client-side state management to handle async data flows and connection resilience

PROJECT: UPSC Examination Platform - Government

Tech: Next.js (SSR/ISR), React.js, TypeScript, Material UI, i18n, WCAG 2.1 AA

- Built Next.js SSR portal for national examination platform; implemented multi-step application form with field-level validation, draft state persistence, and secure file upload (documents, photos, signatures)
- Implemented server-side rendering for initial page load and search engine optimization
- Added internationalization (i18n) support for multiple languages and locales
- Ensured WCAG 2.1 AA compliance throughout; partnered with QA and backend teams on security review gates
- **Government Compliance:** Led requirements gathering with government stakeholders; translated compliance and audit requirements into UI specifications and technical constraints

Software Engineer | Blue9 Technologies, Gurugram

Aug 2020 - Oct 2022

PROJECT: Arab EZ Translator

Tech: React.js, JavaScript (ES6+), Material UI, REST APIs

- Built core authoring surface for translation workflows—rich text editor with formatting controls, live word count, and syntax highlighting
- Developed reusable React components and REST API integrations for content management across multiple locales
- Converted design mockups into responsive, cross-browser interfaces using Material UI with WCAG 2.1 AA accessibility

CERTIFICATIONS & CONTINUOUS LEARNING

Frontend System Design - NamasteDev

High-level and low-level design patterns, REST/GraphQL/gRPC API design, caching and CDN strategies, web performance, security (XSS/CSRF/RBAC), accessibility, offline support, monitoring and logging

EDUCATION

B.Tech, Electronics & Communication Engineering

APJ Abdul Kalam Technical University, Ghaziabad | 2015 - 2019
