

# HEMANT KUMAR JHA

Senior Software Engineer - Frontend | React.js | Next.js | TypeScript

Delhi, India | +91-8700858191 | hemantjhaa97@gmail.com | linkedin.com/in/hemant-jha-frontend-developer

Portfolio: [hemant-jha-portfolio.vercel.app](https://hemant-jha-portfolio.vercel.app)

## PROFESSIONAL SUMMARY

Senior Software Engineer - Frontend with 6 years building production React.js and Next.js applications across automotive, healthcare, entertainment, and government platforms. Focused on Core Web Vitals optimization, WCAG 2.1 AA accessibility, and frontend security. Experienced mentoring engineers, working in Agile/Scrum teams with Jira, and establishing code quality standards.

## CORE SKILLS

**Frontend:** React.js, Next.js (SSR/ISR), TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, Tailwind CSS, Material UI, Micro Frontend (Module Federation)

**State & Data:** Redux Toolkit, TanStack Query, React Hooks, REST APIs, GraphQL

**Performance:** Core Web Vitals (LCP/INP/CLS), bundle optimization (Vite, Rollup, Webpack), Lighthouse

**Quality & Accessibility:** Jest, React Testing Library, SonarQube, WCAG 2.1 AA, ARIA, XSS/CSRF prevention, JWT/OAuth2, RBAC

**Tooling & CI/CD:** GitHub Actions, AWS (EC2, S3, CloudFront), Docker, Git, Jira, Agile/Scrum, Figma, Design Tokens, ESLint/Prettier/Husky

**AI-Assisted Development:** GitHub Copilot, Cursor, and Claude (MCP connectors) for AI-assisted coding, prompt engineering, test scaffolding, code review, and Figma-to-Code conversion; every AI-generated change verified for bugs and security issues before merge

## WORK EXPERIENCE

### Senior Software Engineer, Frontend | Appinventiv, Noida

Sep 2024 - Jul 2026

#### PROJECT **Sonny's Quivio - Automotive Dealer Platform**

Tech: Next.js (SSR), React.js, TypeScript, Redux Toolkit, TanStack Query, Recharts, PWA/service workers, Vite, Rollup

- Engineered a config-driven, multi-tenant Next.js UI using **Micro Frontend architecture (Module Federation)** across CRM, SAT, and white-label modules; built shared component library of 30+ reusable, documented components
- Reduced Largest Contentful Paint (LCP) from 3.8s to 2.6s and cut initial JS bundle size by 25% by migrating the build pipeline to **Vite with Rollup-based library bundling**, code-splitting, and lazy loading
- Delivered the SAT module as an installable PWA with push notifications and offline support via service workers; added a Recharts-based analytics dashboard for dealer usage
- Set up automated visual regression checks and CI quality gates in GitHub Actions, catching UI regressions before they reached production and reducing post-release bug reports by 15%

#### PROJECT **Evaria - Healthcare & Wellness Platform**

Tech: Next.js (SSR), React.js, TypeScript, Material UI, SCSS, REST APIs, GraphQL, WebSockets, JWT, axe DevTools

- Created WCAG 2.1 AA-compliant patient and admin portals using **Next.js SSR** for faster initial page loads, reducing accessibility defects flagged in QA by 20%; added accessible form components, ARIA labels, and keyboard navigation throughout
- Designed and implemented **OAuth2/JWT-based** authentication with role-based access control (RBAC) and enterprise SSO (**Entra ID**) for patient data and admin workflows
- Integrated GraphQL subscriptions and WebSocket APIs for real-time data updates; managed connection lifecycle and error recovery
- Integrated Razorpay payment gateway; handled transaction state management and error cases

#### PROJECT **PVR INOX - Entertainment Booking & Payments**

Tech: Next.js, React.js, TypeScript, Redux Toolkit, shadcn/ui, REST APIs, Jest, React Testing Library

- Shipped a multi-step booking and payment checkout flow using Next.js, Redux Toolkit, and shadcn/ui, with form validation and draft persistence
- Achieved 90% statement coverage on booking and payment flows with Jest and React Testing Library, maintained **SonarQube** compliance, reducing regression risk

### Senior Frontend Developer | UV Technologies, Noida

Nov 2022 - Aug 2024

- Engineering Leadership:** Mentored 4 frontend engineers on React best practices, TypeScript patterns, and WCAG accessibility standards; managed sprint planning and backlog grooming in **Jira** within an **Agile/Scrum** workflow; established a code review checklist adopted team-wide

- **AI-Assisted Development:** Used Claude and Cursor to accelerate feature delivery by about 30%, reviewing every AI-generated change for bugs and security issues — race conditions, stale closures, XSS/CSRF — before merge
- **Accessibility Tooling:** Integrated axe DevTools into the team's development workflow and ran accessibility audits across projects; trained teammates on WCAG 2.1 AA patterns and ARIA usage
- **API Integration:** Standardized REST/GraphQL/WebSocket integration patterns across projects; designed reusable client-side state management for async data flows and connection resilience

PROJECT **UPSC Examination Platform - Government**

Tech: Next.js (SSR/ISR), React.js, TypeScript, Material UI, i18n, WCAG 2.1 AA

- Built the Next.js SSR portal for a national examination platform, reducing page load time by 20% through server-side rendering, pagination, and caching
- Rolled out the multi-step application form with field-level validation, persisted draft state, and secure upload for photographs, signatures, and documents
- Added internationalization (i18n) support for multiple languages and locales; ensured WCAG 2.1 AA compliance throughout
- **Government Compliance:** Led requirements gathering with government stakeholders; translated compliance and audit requirements into UI specifications, and partnered with QA and backend teams on security review gates

**Software Engineer | Blue9 Technologies, Gurugram**

**Aug 2020 - Oct 2022**

PROJECT **Arab EZ Translator**

Tech: React.js, JavaScript (ES6+), Material UI, REST APIs

- Crafted the core authoring surface for translation workflows — a rich text editor with formatting controls, live word count, and syntax highlighting
- Developed reusable React components and REST API integrations for content management across multiple locales
- Converted design mockups into 10+ responsive, cross-browser UI components using Material UI and **Design Tokens** with WCAG 2.1 AA accessibility

**CERTIFICATIONS & CONTINUOUS LEARNING**

---

Frontend System Design - NamasteDev: high-level and low-level design patterns, REST/GraphQL/gRPC API design, caching and CDN strategies, web performance, security (XSS/CSRF/RBAC), accessibility, offline support, monitoring and logging.

**EDUCATION**

---

**B.Tech, Electronics & Communication Engineering**

APJ Abdul Kalam Technical University, Ghaziabad | 2015 - 2019
