

HEMANT KUMAR JHA

Senior Software Engineer - Frontend | React.js | Next.js | TypeScript

Delhi, India | +91-8700858191 | hemantjhaa97@gmail.com | linkedin.com/in/hemant-jha-senior-frontend-developer

Portfolio: hemant-jha-portfolio.vercel.app

PROFESSIONAL SUMMARY

Senior Software Engineer - Frontend with 6 years building production React.js and Next.js applications across automotive, healthcare, entertainment, and government platforms. Focused on Core Web Vitals and performance optimization, WCAG 2.1 AA accessibility, and frontend security, with experience mentoring engineers and owning code review standards.

CORE SKILLS

Frontend: React.js, Next.js (SSR/ISR), TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, Tailwind CSS, Material UI

State & Data: Redux Toolkit, TanStack Query, React Hooks, REST APIs

Performance: Core Web Vitals (LCP/INP/CLS), bundle optimization (Webpack, Vite), Lighthouse, Datadog RUM

Quality & Accessibility: Jest, React Testing Library, XSS/CSRF prevention, RBAC, JWT, WCAG 2.1 AA, ARIA, axe DevTools

Tooling & CI/CD: GitHub Actions, AWS (EC2, S3, CloudFront), Docker, Git, ESLint/Prettier/Husky, Figma

AI-Assisted Development: Claude, Cursor - every AI-generated change reviewed for bugs and security issues before merge

WORK EXPERIENCE

Senior Software Engineer, Frontend | Appinventiv, Noida

Sep 2024 - Jul 2026

- Mentored 4 engineers and established frontend code review standards for React, TypeScript, and accessibility, adopted team-wide.
- Accelerated feature delivery by about 30% using AI-assisted development (Claude, Cursor), reviewing every AI-generated change for bugs and security issues — race conditions, stale closures, XSS/CSRF — before merge and AWS deployment.

PROJECT *Sonny's Quivio - Automotive*

- Built a config-driven, multi-tenant Next.js UI serving 10+ dealer tenants across CRM, SAT, and white-label modules, with a shared library of 30+ reusable components; reduced LCP from 3.8s to 2.6s and cut initial bundle size by 25%.
- Built the SAT module as an installable PWA with push notifications, and used Recharts for dashboard analytics.

Tech: Next.js (SSR), React.js, TypeScript, Redux Toolkit, TanStack Query, Recharts, PWA/service workers, Webpack, Lighthouse, Datadog RUM

PROJECT *Evaria - Cycles & Wellness*

- Built a WCAG 2.1 AA-compliant React.js patient and admin platform, reducing accessibility defects by 20%; implemented JWT authentication, role-based access control, and Razorpay payment integration.
- Integrated GraphQL and WebSocket APIs for real-time data flows within the platform.

Tech: React.js, TypeScript, Material UI, SCSS, REST APIs, GraphQL, WebSockets, JWT, axe DevTools

PROJECT *PVR INOX - Entertainment*

- Shipped Next.js booking, payment, and subscription flows for one of India's largest cinema chains using shadcn/ui components, with 90% statement coverage on booking and payment paths.

Tech: Next.js, React.js, TypeScript, Redux Toolkit, shadcn/ui, REST APIs, Jest, React Testing Library

Senior Frontend Developer | UV Technologies, Noida

Nov 2022 - Aug 2024

- Led requirements gathering with government stakeholders, translating compliance and audit requirements into UI specifications.

- Partnered with backend and QA teams to deliver against strict security and accessibility review gates.

PROJECT **UPSC Examination Platform - Government**

- Built the Next.js SSR portal for a high-traffic national examination platform, reducing page load time by 20% via server rendering, pagination, and caching; developed the multi-step application form with field-level validation, persisted draft state, and secure photograph, signature, and document upload.

| Tech: Next.js (SSR/ISR), React.js, TypeScript, Material UI, i18n, WCAG 2.1 AA

Software Engineer | Blue9 Technologies, Gurugram

Aug 2020 - Oct 2022

- Developed reusable React components and REST API integrations for content management and translation features across multiple locales.
- Converted designs into responsive, cross-browser interfaces using Material UI with WCAG 2.1 AA accessibility.

PROJECT **Arab EZ Translator**

- Built the core authoring surface for translation workflows — a rich text editor with formatting controls, live word count, and syntax highlighting.

| Tech: React.js, JavaScript (ES6+), Material UI, REST APIs

CERTIFICATIONS

Frontend System Design - NamasteDev: high-level and low-level design, networking and communication protocols (REST, GraphQL, gRPC), caching and CDN strategies, web security, performance, offline support, accessibility, logging and monitoring.

EDUCATION

B.Tech, Electronics & Communication Engineering

APJ Abdul Kalam Technical University, Ghaziabad | 2015 - 2019
