

HEMANT KUMAR JHA

Senior Software Engineer - Frontend | React.js | Next.js | TypeScript

Delhi, India | +91-8700858191 | hemantjhaa97@gmail.com | linkedin.com/in/hemant-jha-frontend-developer

Portfolio: hemant-jha-portfolio.vercel.app

PROFESSIONAL SUMMARY

Senior Software Engineer - Frontend with 6 years building production React.js and Next.js applications across automotive, healthcare, entertainment, and government platforms. Focused on Core Web Vitals optimization, WCAG 2.1 AA accessibility, and frontend security. Experienced in mentoring engineers, working in Agile/Scrum teams, and establishing code review and quality standards.

CORE SKILLS

Frontend: React.js, Next.js (SSR/ISR), TypeScript, JavaScript (ES6+), HTML5, CSS/SCSS, Tailwind CSS, Material UI, shadcn/ui, Responsive Design, Design Systems, Micro Frontend (Module Federation)

State & Data: TanStack Query, Redux Toolkit, React Hooks, REST APIs, GraphQL, WebSockets

Performance: Core Web Vitals (LCP/INP/CLS), bundle optimization (Vite, Rollup, Webpack, Turbopack), Bundle Analyzer, Lighthouse

Quality & Accessibility: Jest, React Testing Library, Cypress (E2E Testing), A/B Testing, Debugging (Chrome DevTools), SonarQube, WCAG 2.1 AA, ARIA, axe DevTools, XSS/CSRF prevention, JWT/OAuth2, RBAC

Tooling & CI/CD: GitHub Actions, AWS (EC2, S3, CloudFront), Docker, Git, Monorepo/Polyrepo, Jira, Agile/Scrum, Figma, Design Tokens, ESLint/Prettier/Husky

AI-Assisted Development: Claude Code, Cursor, GitHub Copilot, MCP | Prompt Engineering, AI Code Review, Test Generation, Figma-to-Code | LLM API Integration (Streaming UI)

WORK EXPERIENCE

Senior Software Engineer, Frontend | Appinventiv, Noida

Sep 2024 - Jul 2026

- **AI-Assisted Development:** Used Claude Code and Cursor with MCP connectors for development, test scaffolding, accessibility audits, and PR reviews, including Figma-to-code conversion; reviewed every AI-generated change for bugs and security issues (XSS/CSRF, race conditions) before merge

PROJECT **Sonny's Quivio - Automotive Dealer Platform**

Tech: Next.js (SSR), React.js, TypeScript, Redux Toolkit, TanStack Query, Recharts, PWA/service workers, Vite, Rollup, Cypress

- Engineered a config-driven, multi-tenant Next.js UI on a **Micro Frontend architecture (Module Federation)** spanning the CRM, SAT, and white-label modules, and built a shared library of 15 reusable, documented components
- Reduced Largest Contentful Paint (LCP) from 3.8s to 2.6s and cut initial JS bundle size by 25% through code-splitting, lazy loading, and a **Vite/Rollup build pipeline for library bundling**
- Delivered the SAT module as an installable PWA with push notifications and service-worker offline support, and added a Recharts analytics dashboard for dealer usage
- Set up automated Cypress E2E and visual regression checks and CI quality gates in GitHub Actions, catching UI regressions before production and reducing post-release bug reports by 15%

PROJECT **Evaria - Healthcare & Wellness Platform**

Tech: Next.js (SSR), React.js, TypeScript, Material UI, SCSS, REST APIs, GraphQL, WebSockets, JWT, axe DevTools

- Built WCAG 2.1 AA-compliant patient and admin portals on **Next.js SSR**, with accessible form components, ARIA labels, and keyboard navigation throughout, reducing accessibility defects flagged in QA by 20%
- Designed and implemented **OAuth2/JWT** authentication with role-based access control (RBAC) and enterprise SSO (**Entra ID**) for patient data and admin workflows
- Integrated GraphQL subscriptions and WebSocket APIs for real-time data updates, handling connection lifecycle and error recovery
- Integrated the Razorpay payment gateway, handling transaction state management and payment error cases

PROJECT **PVR INOX - Entertainment Booking & Payments**

Tech: Next.js, React.js, TypeScript, Redux Toolkit, shadcn/ui, REST APIs, Jest, React Testing Library

- Shipped a multi-step booking and payment checkout flow with Next.js, Redux Toolkit, and shadcn/ui, including form validation and draft persistence
- Achieved 90% statement coverage on booking and payment flows with Jest and React Testing Library and kept **SonarQube** compliance, lowering regression risk

Senior Frontend Developer | UV Technologies, Noida

Nov 2022 - Aug 2024

- **Engineering Leadership:** Mentored 4 frontend engineers on React best practices, TypeScript patterns, and WCAG accessibility; ran sprint planning and backlog grooming in **Jira (Agile/Scrum)**; established a code review checklist adopted team-wide
- **AI-Assisted Development:** Used Claude and Cursor for code review and test scaffolding, reviewing every AI-generated change for bugs and security issues before merge
- **Accessibility Tooling:** Integrated axe DevTools into the team's development workflow, ran accessibility audits across projects, and trained teammates on WCAG 2.1 AA patterns and ARIA
- **API Integration:** Standardized REST, GraphQL, and WebSocket integration patterns across projects, with reusable client-side state management for async data flows and connection resilience

PROJECT **UPSC Examination Platform - Government**

Tech: Next.js (SSR/ISR), React.js, TypeScript, Material UI, i18n, WCAG 2.1 AA

- Built the Next.js SSR portal for a national examination platform, cutting page load time by 20% through server-side rendering, pagination, and caching
- Delivered a multi-step application form with field-level validation, persisted draft state, and secure upload of photographs, signatures, and documents
- Added i18n support for multiple languages and locales, with WCAG 2.1 AA compliance throughout
- **Government Compliance:** Led requirements gathering with government stakeholders, translated compliance and audit requirements into UI specifications, and worked with QA and backend teams on security review gates

Software Engineer | Blue9 Technologies, Gurugram

Aug 2020 - Oct 2022

PROJECT **Arab EZ Translator**

Tech: React.js, JavaScript (ES6+), Material UI, REST APIs

- Built the core authoring surface for translation workflows: a rich text editor with formatting controls, live word count, and syntax highlighting
- Developed reusable React components and REST API integrations for content management across multiple locales
- Converted design mockups into 10+ responsive, cross-browser components using Material UI and **Design Tokens**, meeting WCAG 2.1 AA

CERTIFICATIONS & CONTINUOUS LEARNING

Frontend System Design - NamasteDev: high-level and low-level design patterns, REST/GraphQL/gRPC API design, caching and CDN strategies, web performance, security (XSS/CSRF/RBAC), accessibility, offline support, monitoring and logging.

EDUCATION

B.Tech, Electronics & Communication Engineering

APJ Abdul Kalam Technical University, Ghaziabad | 2015 - 2019
